With ground up architecture and varied industry frameworks, our solution portfolio caters to all major industry verticals. Our flagship enterprise cloud platform, Harbour1®, forms the backbone of our extensive stack of "As a Service" and "On Demand Solutions" around IaaS, PaaS Network, Security, Storage, Disaster Recovery, Backup and Containers. The portfolio stages off-the-shelf and customized data center services like Colocation, White Space and Managed Hosting, coupled with a strong layer of Managed Services.
